## Unit-of-Use/Compliance Packaging

Legacy specializes in providing unit-of-use and compliance packaging solutions. We make it easy to transition into the program and can help guide your company from start to finish. Allow Legacy the opportunity to show you why we have quickly become an industry leading provider of unit-of-use and compliance packaging solutions.

The American Public Health Association (APHA) advocates the adoption of unit-of-use packaging as the industry standard to enhance patient safety.

### Pharmacy Advantages

- Increases pharmacy efficiency while decreasing dispensing errors
- Packaged under Legacy's NDC code
- Rebates can be managed by Legacy
- Affords increased pharmacist/consumer interaction

### Consumer Advantages

- Senior friendly/child resistant
- Promotes regimented dosing
- Supports low cost generic program
- Reduced wait time for prescriptions

## Packaging & Dispensing

Legacy has the proven expertise to meet the highest standards for both commercial and sampling packaged product.

Our turn-key services include managing through the set up and approvals of Master Batch Documents, artwork generation and the procurement of all components required for packaging.

Legacy's commitment to being your Total Pharma Solution Provider ensures we offer a wide range of packaging services including: bottle filling, blister filling, flexible secondary packaging, inspection and rework.

### Bottle Filling

- High speed, cutting edge in-line technology
- Bottle sizes ranging from 30cc to 1500cc
- Flexible insert/outsert and label applications
- Packaging suites designed to meet needs of low and high volume packaging runs

### Blister Filling

- Hospital Unit Dose (HUD) formats
- From low to high barrier films/foil
- Thermoform and cold form
- Flexible end of line equipment for bundling, cartoning or casepacking

## Secondary Packaging

- Clamshell blistering
- Display packaging
- Shrink wrap & stretch packaging
- Cartoning & kitting

## Inspection & Rework

- Protocol creation, approval & execution
- Insert/topsert replacement
- Overlabeling
- Depack & repacking

## Serialization

With Legacy's total serialization solutions, you can be confident in bringing your serialized product to market.

- Inline bottling and blistering solutions
- Offline & Secondary serialized solutions

## Warehousing & 3PL/Distribution

Headquartered in St. Louis, MO, our combined 300,000 sq ft cGMP compliant facilities are centrally located to offer our customers an ideal location for meeting their warehousing and distribution needs.

- Fully secure cGMP facilities
- DEA approved vault for C-II & approved cage
- Bulk or finished product receiving
- Inventory management & distribution
